Allestree. 1619.

A New Almanacke and Prognostication, for this yeare of our Lord God, 1618.

Being the 3. from the leap yeare.

Calculated, and properly referred to the Elevation of the Pole Artick and Meridian of the famous towne of Derby: & may serue generally, for the most part of Great Britaine.

Made and written according to lawfull Art, by Richard Allestree, Practitioner in Sidera Scientia, & Physicke.

Deut. 29. 29.
The secret things belong to the Lord our God, but the things reuealed belong vnto vs, and to our children for euer.

Cum Priuilegio.

The common notes and moueable Feasts, according to the

English accompt. ⁓ Roman accompt.

King James the first of England, whome God long preserue, began his reigne of England, 1602. March 24. Compleat 16. but Currant 17. and of Scotland Currant 58. July 29.

We being withall to obserue, that the golden Planet Venus, or rather Φωσφορος, is Occidentall, or our glittering Euening Starre, setting after the going downe of the Sunne, and thereof tearmed Εσπερος, vel vesperus, that is the Euening Starre, from the beginning of this yeare till the ninth of Februarie: but then being Orientall, she becommeth our bright morning Starre before sun-rising, and thereof called Lucifer, during the residue of this yeare.

A perfect Table of the foure Tearmes and their Returnes, with the Essoyne daies fitting this yeare, 1619

Cambridge Commencement falleth out the fift day of Iuly, the Vespers vpon the Saturday next before.

Oxford Act happeneth vpon the 12. day of Iuly, the Vespers vpon the Saturday immediately before.

The Anathomy of mans body, as the parts thereof are gouerned by the 12. signes of the Zodiaque.

Aries the head and face.

Taurus Necke & throat

Cancer Breast stomak & ribs.

Virgo bowels & belly.

Scorpio Secret members.

Capricornus Knees

Gemini Armes & shoulders.

Leo Heart & backe.

Libra Reines & loines

Sagitarius Thigh

Aquar. The legges.

Pisces the feet

♈ Aries ♉ Taurus ♊ Gemini ♋ Cancer ♌ Leo ♍ Virgo ♎ Libra ♏ Scorpio ♐ Sagitarius ♑ Capricornus ♒ Aquarius ♓ Pisces.

In the firſt Colume of this my Almanack, toward the right hand, you haue the houre and minute of the Sun riſing, for euery day in the yeare: which houres and minutes, are halfe the length of the ſame night: as the 1. of Ianuarie, the ſunne riſeth at 8. a clocke, 0. min. which being doubled maketh 16. houres, & no min. the length of that night. And to knowe the time of the ſun-ſetting, take the houres & minutes found in the Almanacke for ſun riſing, from 12. and you ſhall haue the ſun-ſetting left: of which being doubled is the length of the day. For example, Ian. the 8. day, the ſun riſeth at 8. and no min. then take 8. from 12. and there reſteth 4. the houre of ſun-ſetting on that day, 4. being doubled, maketh 8. houres, the length of that day, and ſo of all the reſt.

I haue alſo ſet down in the head of euerie Month, where and how the 7. plannets, with the Dragons head are placed in the 12. ſigns of the Zodiake, with the ſignes and degrees they bee in at noone, for the 1, 10. & 20. day of euerie month this yeere: and alſo on the left hand, I haue ſet downe Morning & Euening riſing and ſetting of ſome notable fixed ſtars, with their natures: and this is for good purpoſe: for by knowing their riſing and ſetting, you may know the houre of the night, and by knowing the Houre, you may learne to know the ſtars: with many other excellent, pleaſant, and profitable vſes, fit for Scholers, Gentlemen, and Mariners.

A Tide-Table whereby is easilie found the time of full-sea, at the chiefest Ports, in and adioyning *this Kingdome*.

For these places adde houres and minuts.

Allestree 1619.

A CHRISTIAN PROGnostication for this present *yeare of our Lord God.* 1619

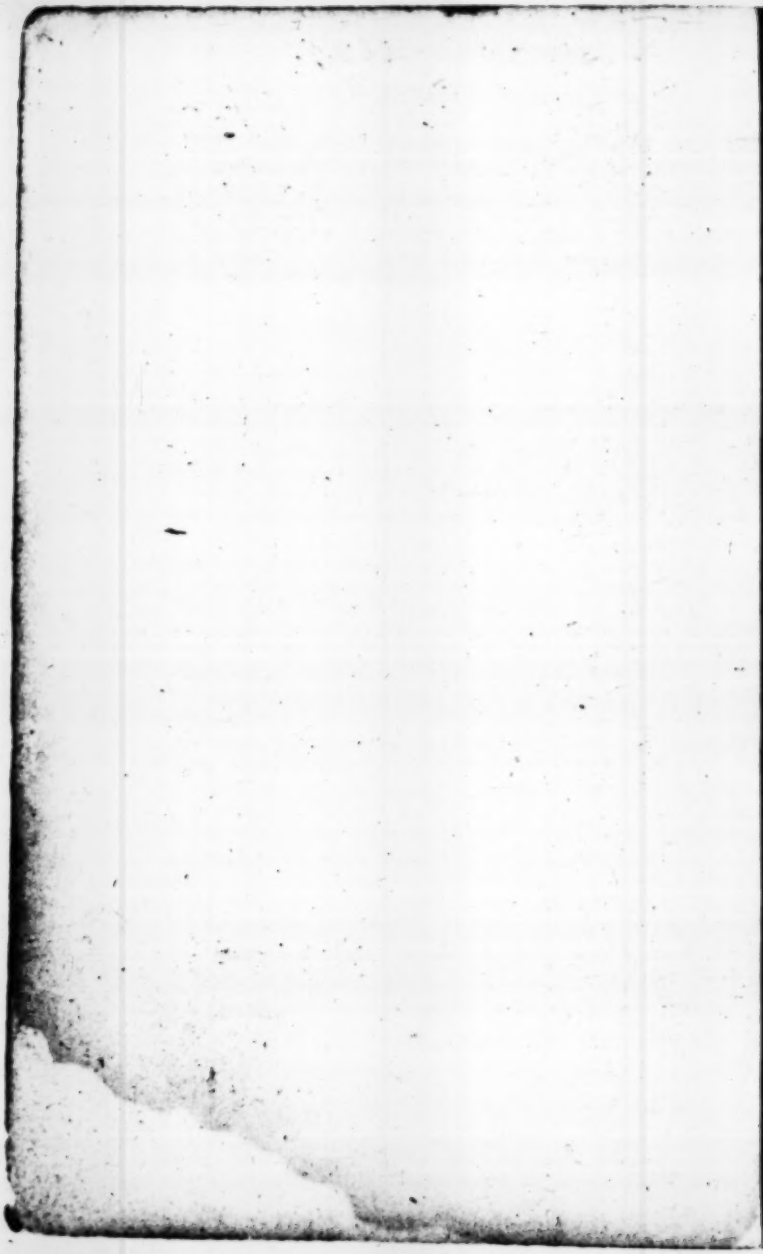
A subiect, well meriting the probation of *the Iudicious, who best know how to confirme* their knowledge: contayning a declaration *of the foure quarters of the yeare*, Astronomicall Calculations, the naturall causes of the Eclipses of the *Sunne* and *Moone* this yeare, with predictions of Dearth and Plenty, also notes both *Phisicall* and *Cuill*, whereunto are annexed many compendious Tables.

The like whereof for varietie of Discourse, mixed with profit, and modest delight, *hath not heretofore been published.*

By RICHAD ALLESTREE, Practitioner *in* Siderali Scientia, *and louer of Truth.*

Residens super ethere cuncta, Rex Deus gubernat.

Cum Priuilegio.



A Diſcription of the Foure Quarters of this yeare. 1619.

THis Hyemall Solſticiall, or Brumall Quarter Aſtronomicall of this yeare 1619. according to the common doctrine of Aſtronomers, beganne the 11. day of December in the yeare 1618. at what time the Sunne entred the firſt grade of the imagined cold ſigne Capricorne, in quibus Sol reuerſus facit in ſito aſcendendo à vertice, aër frigidiſſimus exiſtit. Et ſit frigidus & humidus, Flegmaticus, & ſenili etati congruens.

Of the Spring Quarter.

THe Vernall Equinoctiall, or the Spring, is the moſt comfortable Quarter in all the yeare, hanc tria ſigna ♈, ♉ & ♊ complectens, ſit in qualitatibus, inſtar veris, humidus & calidus, inſuper ſanguineus & etati puerili conueniens. This Quarter doth commence this yeare vpon the 10. day of March, about 9. a clock in the after noone. at what time the Sunne maketh his ingreſſe into the firſt grad of the imagined ſigne Aries—making the dayes and nights to be equall.

Of Sommer Quarter.

The Spring time being fully finiſhed, the ſecond Solſtice, or Aeſtiuus of that yeare called the Aeſtiuall or Summer Solſtice taketh his place at the Sunnes ingreſſience into the firſt grade of Capricorne: At which very time, the Summer quarter euermore taketh the beginning. and ſhall bee this yeare the 12. of June: about one a clock after midnight: And continueth vntill the 13. day of September. about 7. a clocke P. M. Sit calidus & ſiccus, Cholericus, Iuuenali etati dominans.

A Prognostication.

Of Harueſt or Autumne.

The Neuer reſting Sunne comming againe to the ſecond Equinoctiall poynt, or firſt ſcruple of the imagined ſigne Libra, beginning our Autumnall quarter, or ſecond Spring, making againe the dayes and nights of lengths equall, this Quarter, beginneth the 13. day of September about 3. a clock in the after noone. Sic ſiccus & Frigidus, Melancholicus ac decreſcens, virili etati præſides.

Aſtronomicall Calculations for this preſent yeare. 1619.

THe true proceſſion of the Æquinoctiall is, 28. grades, 15. minuts. 56. ſec. 45. thirds.

The greateſt obliquitie of the Zodiake, is according to the Vptonian tables 23. degrees 28. mnts. 1. ſec. 26. thirds

The excentricitie of the Sunne by the Vptonicke tables is 32203. the totall 1000000. 211. part 55 min.

The true Tropicall yeare is 365. Dayes, 5. hour, 53. ſcrup. 34. ſeconds 41. thirds.

Saturne is retrograde vnto the 22. of January, from thence vnto the 23 of September, Direct. The reſt retrograd.

Iupiter is Direct from the beginning of the yeare, vntill the 24. of July. and from whence retrograde till the 27 day of November, from whence to the yeares end Direct.

Mars is retrograde from the 7. of February, till the 27. of Aprill.

Venus beginneth to bee retrograde the 29. of January till the 9. day of March, and all the yeare after Direct

Mercury beginneth to bee retrograde, firſt from the firſt day of February, till the 24 day of the ſame moneth. ſecondly, from the 29. day of May, till the 21 day of June. thirdly, from the 22. of September, till the 14. of October.

Qi

Of the Eclipſes of the Sunne and Moone, the naturall cauſes. and when they chance to bee Ecclipſed: and firſt of the Moone.

THough this word Eclipſe may bee generally taken for the hiding or darkening of any Starre from our ſight, yet here it is chiefely to be referred to the Eclipſe of the Sun or Moon which is the depriuing of their light, from the ſight of vs here vpon the Earth: But firſt I will treate of the Eclipſe of the Moone, and ſhew how and when it chanceth. The Moone hauing no light of it ſelfe, but onely from the Sun, is neuer Ecclipſed. but when the Earth is betwixt her and the Sunne. which cannot chance but when the Moone is at the full, and diametrically oppoſite to the Sunne: And alſo when ſuch oppoſition is either in the head or tayle of the Dragon. or ſomewhat nigh thereunto, which are nothing elſe but the two ſections of two circles. called in (Greeke) that is in Engliſh, the two Nodes or interſections, that is to ſay, the Node aſcendent, and deſcendent. Now there is variable ſhapes, or ſhaddowes of the Eclipſe of the Moone: For there bee three kinds of ſhaddowes, that is Conicall, Cylindricall, & Calathoidall, the ſhaddow Conicall, is that which endeth with a ſharpe point like a Toppe. The Cylindricall, is of like bigneſſe euery where like a round piller: And the Calathoidall ſhaddow, the farther it interdeth, the greater it is, like a cup or bowle, it is narrow at the bottome, and broad at the brim: of which ſhape that ſhaddow taketh his name, for Calathos in Greeke, is as much to ſay as a Cup. Thus much touching the Eclipſe of the Moone, and now I will ſpeake of the Eclipſe of the Sunne.

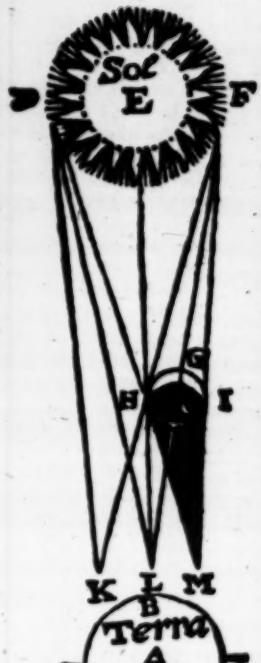
The Eclipſe of the Sunne, is nothing elſe but the darkening or depriuing of his light from our ſight, cauſed by the interpoſition of the body of the Moone, betwixt the bodie of the Sunne, and the bodie of the Earth: and this Eclipſe neuer happeneth but when the Moone and the Sunne, ar in a viſible conjunction. For you haue to note, that there bee three kinds of conjunctions, that is meane, true, & viſible, or apparent to our ſight, it is called a viſible conjunction, when a right

line being drawne from our eye or sight, passeth through the center of the Moone, vnto the center of the Sunne, whereby the said two Planets appeare to our sight to be in one selfe degree of longitude, that is to say, in one selfe poynt of the Ecliptick. For although that the Center of the Moone, bee betwixt the center of the Sunne, and the center of the Earth at euery true Coniunction, and also neere to any of the Nodes, yet perhaps it shall appeare no Eclipse to our sight, because the two Planets bee not in a visible coniunction, as hath beene Demonstrated before: Neither can the Body of the Moone, being farre lesser then the Earth, possibly shadow at any time all the Earth,: And the body of the Sunne, is farre bigger then eyther of them both. And this is a generall obseruation, that no Eclipse of the Sunne is vniuersall (except that which was against nature at the death of Christ, for it was at a full by gone) but alwayes particular, that is, it may be seene in some few places, but not in all places of the World at one time, neyther doth it begin or end in all places at one selfe bignesse, or one shape, but in one place is totall, and in another place at the same time Partiall, & in other places againe there appeareth no Eclipse at all: neither can any Eclipse of the Sun or Moone bee, but when those two Planets are eyther in the head or tayle of the Dragon, or else very nigh the same, all which things you shall better vnderstand by this figure here following.

Frustra enim longius fit per plura,
Quod Brevius fieri potuit per pauciora.

The

The Figure belonging to the Eclipſe of the Sun, with the deſcription thereof.



THis figure as you ſee conſiſteth of 3. circles, and certaine right lines: of which circles, the higheſt and greateſt repreſenteth the body of the Sunne, and the middle little circle, made almoſt all black, ſignifieth the body of the Moone, and her ſemidiameter marked with e g, & her whole diameter with h i, and the ſmall upper portion of her Body made white, is that which is lightened by the Sunne, all the reſt of her body being darkened. The third and loweſt circle being greater then that of the Moone, ſignifieth the body of the Earth, whoſe center is marked with A, and the ſemidiameter thereof with a b, drawn as touching the ſignificators of the right lines, the letters thereto belonging doe ſhew: For the outermoſt lines marked with F I and D H, doe ſignifie the outermoſt beames of the Sunne that both fall vpon the Body of the Moone, concurring or meeting in the poynt M, enclofing the Conicall ſhadow of the Moone, marked with the Letters M H I, the axletree of which Conicall ſhadow is the middle line C M, for to thoſe that dwell vpon the Earth vnder the poynt M, the Sunne is totally Eclipſed. and to thoſe that dwell vnder the poynt L, he is partly Eclipſed. and partly not. and to thoſe that dwell betwixt L and K, her is not Eclipſed at all.

A Prognostication.

The Heauens declare the glory of God, and the firmament sheweth his handy worke. Psal. 19. 1. Yeere the Heauens are a Schoolemaster to all Nations, but they neuer to Barbarous.

Of the Eclipses happening this present yeare. 1619.

FOure Eclipses will happen in this yeare in the Sunne and in the Moone, vpon the superficies of the Earth: Two of the Sunne and two of the Moone, of which two of the Moone only will bee seene in our Horizon: That of the Sunne, est Sub terra, & non supra centrum Horoscopi. The first of the Sunne shall happen the 3. of January, about 9. of the clocke and 24. minutes at night. the Sunne and Moone being in the 25. degree, and 35. min. of Capricorne, neere the Dragons head and is to bee seene neere new Spaine, & California. The second Eclipse is of the Moone, and is to bee seene heere at Darby at a 11. a clocke, and 27. min. at night neere the Dragons head, being but a very small Eclipse: she being in the 4. grade 46. min. of Capricorne: And diametrally opposed to the Sun, being in the 4. degree. 49. min. of Cancer, she shall be darkened 3. deg. The beginning of this Eclipse will bee at 10. a clocke and 20. min. at night the middest at 27 p[ast] 11. the end, 34. min. past 12. So from the beginning to the end, will bee 2. hou. and 14. min.

The third Eclipse is of the Sunne, and it will happen to be seene in Africa. For although this true conjunction happen vpon our Horizon, wee shall not see it at Darby: But to such regions and territories, as are vnder the Longitude of 40. grad. and 46. min. may visibly note the same. the first day of July, being Wednesday, about 11. a clocke, and 57. minutes before Noone.

The 4. Eclipse, is of the lesser of the two great lights, ruler of the night, Gen. 1. 16. is the lowest of the Planets, (I meane the Moone) being opposite vnto the Sunne, her naturall light giuen, the 11. day of December being Sunday at a 11. a clock and 40. minutes in the Morning, she hasting to shew her greatest beautie of light, and absolute roundnesse, will be preuented by the interposition of this darke Globe of the Earth, which will then let or hinder the glorious beames of the Sun, from giuing

giuing his borrowed light vnto the body of the Moone, whereby she will suffer no Eclipse at all losse of Light, vnto the quantity of 12. digits, (her whole Body being diuided into 12) in Diameter, she will beginne to loose her light at one a clock, and 6. minutes past. And in her greatest obscuritie at 12. a clock and 4 minutes past. And not fully recouered, till 34. minuts past 4. a cloche. so that from the beginning to the end will be 3. houres 34 minutes. that small light she will retayne in her greatest time of her darkenesse, will appeare vpon the Southerly side of her Body. Shee being not farre from the Dragons taile: Ac primum quidem loca planetarum talia deprehendantur, ☉ in 29. grad. 0. ♌. ☾ in 29. grad. 6. ♏, ☊ in 4 grad. 3. ♑ ☿ in 9. grad. 56. ♐: ♃ in 24 grad. 54. ♈: ♂ in 4. grad. 31. ♓: ♀ in grad. 2. ♑: ♄ in 5 grad. 30. ♑. Now, whereas nothing is in Nature without his Contents, I am to subscribe to the opinion of the Noble Mathematician and Astrologer, Petrus Petatus, who in the Proeme to his Diaria, giueth out this learned Iudgement: Among the sorts of future euents, some haue an infallible proceeding appoynted them of God, as the moving of Heauen, the rising and setting of the signes, Iob. 38. 32. the coniunctions of Planets, and Eclipses of the Sunne and Moone, &c In which points is an infallible and determinate certainty in respect of the mouement, and all hinderances are removed from them euery way, vnlesse Gods predominant Will, and diuine prouidence shal stay them miraculously, & extraordinarily, which neuertheless vseth alwayes naturall and ordinarie instruments (which much more imposing the same conclusion: his only exception is, Vnlesse secondarie causes bee strangely forestalled of the principall and first cause, which is God For as all other things, so Planets are in Gods hands, who is truely tearmed of the olde Philosophers Ens Entium, and Causa Causarum, Thirdly: Nihil difficilius quam de futuris veritatem predicere.

Times, or generall rules of Husbandry as sowe-ing, planting, and gardening, superstitiously attributed to the Moone in the 12. Signes of the *Zodiaque*.

They say it is good to Sowe, Set, or plant Trees, when the Moone is in Taurus, Virgo, Capricorne and Pisces, good to Sowe all kinde of Corne, when the Moone is in Cancer.

Good

Good to graft when the Moone is in Taurus & Aquarius in the increase. Good to cut hayre of the Head. for the auoyding of baldenesse, in the increase of the Moone. Good to fell Timber for buildeng in the wayne. for the auoyding of Wormes, But to plash hedges. fell wood to burne, that the stock may the better grow againe, the Moone increasing. Good to geld Carrell the Moone in Aries, Sagitary, or Capricorne, in the increase. Remoone and set yong trees in the first quarter, the weather being warme and dry: from September vntill February Set or Sowe all kindes of seedes, the Moone in Aries, Taurus, Cancer, Virgo, Libra, Capricorne, Aquaries Pisces: But the seedes whose rootes be round, must bee sowne about the full Moone. Cut vines in the end of January, in February, and in the beginning of March. (and also Hedges) Dung your Land (that weedes may not abound, in the last quarter.

Sheere Sheepe in the increase. fell fat Swine in the increase nigh the full Moone, the Larde better to indure the hayling. Gather Apples and fruits in the increase nigh the full, the better to keepe from rotting. Good for ablactions or weaning of children, let the Moone be in the last quarter, to make them forget the Pap, or Nurse. Sowe Beanes and Peason, about the full Moone. but Lentiles and Fitches in the last quarter. Good to destroy Caines, Hayre, Wennes and Warts, cut them in the last quarter of the Moone, and shee in coniunction quartil or opposition with Saturne or Mars. Commit thy way vnto the Lord, and he will direct thee. Psal. 37. 5. Then not the Moone.

Rules concerning Phisicall Elections.

Quatuor humores in humano corpore constant:
Sanguis cum cholera, flegma, melancholiaque.
Terra melan, aqua flog. & aer sanguis choler igni.

The ancient doth say: that when the weather is extreame hot, or exceeding cold. it is not then good to Purge, or to let blood, vnlesse that some great necessity doe require it. And therefore Hipocrat part. 6 & 46. Aphori. saith that the Spring & Autumne, are most conuenient to take Phisicke, then Summer or Winter. There bee some (more precise then wise) that say. no part of mans body ought to bee touched with any Chirurgicall Instrument, or Cautere, actuall or potentiall. at what time

time the Aſtronomer ſaith: the Sunne, Moone, or Lord of the Aſcendent is in the ſame imaginary ſigne. Weakeneſſe attributed to the part of mans body. In the firſt, and third weekes of the Moone, it is beſt vſing externall Euacuations, Phlebotomy, Bathes, Cupping, &c. but in the ſecond and fourth weekes of the Moone, internall Euacuations, becauſe the very ſpirit and life reſteth in the blood, for it is the cheefeſt humour in Mans body: For In Vrinis, Sanguis eſt fundamentum, caloris naturalis, in which Naturall heate is comforted, therefore it ought not to be let out, but vpon great occaſion and ſound aduiſe of ſome learned Phiſitian: For otherwiſe it may make a way to many grieuous infirmities. And as concerning letting of Blood. I ſay it is beſt for the Peſtilence, Plurifie, Squinſie, Eſquinancie, a continuall burning Ague, a continuall or great Head-ach, proceeding of choller, or hot ſuperfluous blood: or for any extreame paine cauſed by heate, choller, or ſuperfluitie of Blood. A (man in all theſe caſes) may not tarry for a choſen day by the Almanacke, becauſe the Patient might die in the meane ſpace: But incontinently with all ſpeede, hee muſt be let blood, vnleſſe he be very weake, and like to ſowne.

Concerning age, yong infants, and decrepit old age theſe both are vnfit to haue Phiſicke adminiſtred vnto them. or to be let blood. Now in letting of Blood, there bee many things to bee weighed and conſidered: Therefore I would not yeth that any man ſhould truſt too much to the vnlearned Chirurgion.

Giue any medicine for the Wormes, a day before and after the new Moone. Drinke no Medicine in the houres of Saturne or Mars, if you can know when they bee: Neyther enter or beginne any Journey eyther of Sea, or Land. Haly Abenz Item, an Vnguent or Plaiſter is beſt applied, when the Moone is in that ſigne which gouerneth the member whereunto it is in or applyable.

The fitteſt times to take Purgations. are to bee Elected according to the motion of the Moone, in watery ſignes, as in Cancer, Scorpio, and Piſces: And take heede alſo that the Moone bee not in Aries, Taurus, firſt part of Sagitarie, and all Capricorne, or ioyned to any retrograde Planet. (in giuing purging medicines) for they cauſe vomit.

☽ in ♋ in ♐ or ♑ aſpect of { ♄ not combuſt, is good to auoid choller / ☉ is good to purge Phlegme / ♄ is good to expell Melancholy } with Electuaries

☾ in ♈ in ☌ ☍ or △ aspect of ☿ ☉ ♄ good to Purge Choller Phlegme Melancholy with potions

☾ in ♓ in ☌ ☍ or △ aspect of ☿ ☉ ♄ good to Purge Choller Phlegme Melancholy with Pills

Take Vomits, the Moone being in Leo, Aries, Capricorne.

Take Purge by Neesing, Oliters, Gargarismes, Preparatives, stop Rhumes, stop Fluxes — The Moone in Cancer Leo, or Virgo, Ari. Libr. Virg or Aqua. Cancer, Aries, or Capri. Gemi. Libra or Aquar, Tau. Virg or Capricor.

Good to comfort the Vermen. Attractive, Resentive, Digestive, Expulsive — The Moone in Ariet, Leo, or Sagitari, Tauras, Gemi. Capricorn. Gemi. Libra, Aquarius. Cancer, Virgo, Pisces.

To enter into Bathes for hot diseases, let the ☾ be in ♈, ♌, &c. For cold diseases, in Aries, Leo, or Sagitari.

And to conclude.

Si tibi deficiunt medici, medici tibi fiant,
Hæc tria, mens læta, requies, moderata dieta.

Vse three Phisitions skill, first doctor *Quiet*,
Next doctor *Merriman*, and doctor *Diet*.

The Church of England of an ancient custome beginneth the yeere on the 25. day of March.

The equall Tropicall yeare beginneth the 11. day of March containing 365. dayes, 5. houres, 49. minuts.

The Sydereall or starrie yeare, beginneth the tenth day of April, containing 365. dayes, 6. houres, 9. minutes, &c.

The

Allestree. 1619.

The Feast of Easter was first celebrated on the 14. day of Aprill, in the yeare of the World, 1453.

In Groine-land, the Sunne setteth not in 2400. houres vnder the pole Artick, it setteth not in 4560. houres.

Of diuers sorts of Moneths.

The moneth Solar, it is the space of time, that the Sunne remayneth in one signe of the Zodiaque.

The moneth of Penagration, is 27. dayes. 7. houres. 43. minutes. 7. sec. 15. thir. 36. fort. 55. fifts.

The moneth of Apparition, is 28. dayes.

The moneth Medicinall is, according to Galen, 26. dayes and a halfe.

The moneths of Consecution, is 29 dayes and a halfe: these 4. latter Lunar Moneths, Iohn de sacro Bosco noteth.

The difference of the length of the day in these 3. places.

			Ho.		Minutes	
As	London, Derby, Yorke	The longest day is,	16, 16, 16	and	26, 44, 58	long.

Anatomy of wonder great I speake, and yet am dead, mans suck sweete liuer, from their black veines, which mother milke-some liueth.

A word or two of the rootes or grounds of Election.

THis word Election, it comes of the Verbe Eligo, to elect, choose, or pick out: Now the word of the Lord saith, Leuit. 19. 16. Ye shall not vse witchcraft, nor obserue (elect, or choose out) times, that is to measure luckie. 21 vnluckie dayes, Heathen Starre-gazers, and heathenish Prognosticators. Esaiah 47. 13. These remember not the words of a true Astronomer named Salomon, in his Prou. 20. verse 24. The steps of man are ruled by the Lord: And what doth a man vnderstand of his way? The Lord by his prouidence hath the appointment of the cogitations, purposes, actions, and speeches of men, together with

this

the successes, and events of all that they deale in, their moulings and stirrings are not by their owne strength, nor by the influence of the Heauens and Planets, but by the power and will of the Almighty. Phil. 2. 13. For it is God that worketh in you the will and the deede euen of his good pleasure. And after a speciall manner by his grace and spirit, hee directeth and guideth the hearts and waies of his people for his owne seruice, and their saluations, who hath wisdome and knowledge of himselfe rightly to order his affaires, & to discerne the effects & issues of that which he takes in hand, & to foresee the things that shall befall vnto the end of the World. God is the Author of Nature, and chiefe cause of all good. Motat terras, & transfert regna pro bene placito. Dan 2. 21. and Ephe. 1. 9. According to his good pleasure which he had promised in himselfe Againe, Dan. 4 32, and according to his will hee worketh in the armie of Heauen, and in the inhabitants of the Earth, and none can stay his hand, nor say vnto him, what doest thou? Now. Da amantem sentit quod dico: Si autem frigido loquar: Giue me a man that is in loue with God, and hee feeleth this to be true which I say, but if I speake to a cold Christian hee vnderstandeth not what I say. May furthermore as I said in my Prognostication 1618. Sentum sapit, cui sal non sapit, cui quod omnis sapit, quo vere sapit: that is. Hee fauoreth of a Foole that doth not relish that salt, which seasoneth all things, whereby he may bee truely wise.

Then shall wee beleeue, or giue any credit to these foolish fables of Iudicial Astrologians, Prognosticators, Moone-Prophets, Egyptians & Arabians, which would make vs beleeue the Moone is made of greene Cheese: And that they can discerne mens affaires the effects and issues of the labors they take in hand, and to foresee the things which shall befall, or come to passe in the Common wealth, and all these things they say they can doe by the influence of the Starres, and motions of the Heauens. Now therefore I haue prooued vnto you, that you cannot doe these things lawfully by the word of God: nor in truth. Let the word of God rule, and vse no more Astrologicall or Iudicial-iudgements: For God gouerneth the Stars. I know for truth that the Heauens and Celestiall bodies, are the treasurie and treasurie, wherein almighty God hath inrolled and laid vp in his store-house (as it were) the meanes of his decree, for proofe I referre you to these places of Scripture. Exo. 9. 18. & 10. 19 Gen. 17. 18. Deut. 4. 19. Iudg. 5. 4. 20. Psal. 89. 4. Hose 2. 21. 23. Iob. 38. 22. 23. and so to the end of the

chapter.

chapters. How can a man, much more a Heathen man, know Gods secret will. Doe you know when God will open his treasurie, or vnstop his Bottles in the Heavens. Iob. 38.37. to giue vs Frost, Hayle, Snow, Raine, and all other kinde of weathers Dearth, Plenty, Sickneſſe, Good dayes, Euill dayes, and ſuch like. No, and hee ſaid vnto them, It is not for you, (you Aſtrologians and Prognoſticators) to know the times or the ſeaſons, which the Father hath put in his owne power. Act. 17. 23. that God commanded the clouds aboue, and had opened the doores of Heauen, and ſhut not the ſtarres. Ier. 14. 22. Are there any amongſt the Gentiles that can giue Rayne? Or can the Heauens giue ſhowers Is it not thou O Lord our God. & Pſal. 33.10. The Lord bringeth the counſell of the Heathen to nought: and maketh the deuices of the people to bee of none effect. Then ſay with holy Dauid. Pſal. 139. 6. Thy knowledge (O Lord) is too wonderfull for me: it is ſo high I cannot attaine vnto it. Now to certifie thee courteous and vnderſtanding Reader, that of the 10. foolish paradoxes mentioned in an Almanack 1618. I neuer writ of, ſee my 2 bookes and you ſhall knowe but that, the Aſtrologicall iudiciall predictions are altogether vnlawfull, and vtterly forbidden by Sacred Writt, and that of Phlebotomie, I will maintaine by Gods helpe to bee true. And ſo I end vntill next yeare.

God ſaue our gracious King IAMES.
